

Anisur Rahaman Maruf · UI/UX Designer, Frontend Developer & AI Researcher

Computer Science and Engineering undergraduate at Green University of Bangladesh. Founder & Content Strategist of Design w Anis. Dedicated to User-Centered Design (UCD), high-fidelity Figma prototyping, modern frontend web engineering, and medical deep learning computer vision research.

UI/UX Design

Figma Prototyping

User-Centered Design (UCD)

HTML5 / CSS3 / JS

React / Next.js

Tailwind CSS

PyTorch & Deep Learning

Computer Vision

Competitive Programming

Git & GitHub

EXPERIENCE & LEADERSHIP

Design w Anis (YouTube Channel) · Founder & Content Strategist

YouTube & Online Design Platform · Jan 2023 – Present

- Managed and scaled an online educational platform focused on UI/UX and graphic design by producing high-quality tutorial series and workflows.
- Formulated comprehensive content strategies, analyzed channel audience metrics, and led community engagement to resolve complex UI/UX and technical design challenges.
- Designed curriculum and structural roadmaps for comprehensive design bootcamps, high-fidelity wireframe kits, and digital UI assets.

Freelance & University IDP Project · Freelance UI/UX Team Lead & Frontend Developer

Dhaka, Bangladesh · Jan 2023 – Present

- Led a remote team of designers on freelance UI/UX projects, managing end-to-end client communications, user research, wireframing, and final delivery.
- Served as the core UI/UX and Frontend Developer for the university Interdisciplinary Project (IDP), successfully bridging the gap between Figma design systems and functional code.
- Collaborated with cross-functional team members to implement clean, responsive, and accessible user interfaces using modern frontend technologies.

RESEARCH & LEADERSHIP (CONTINUED)

Early Detection of Diabetic Foot Ulcers Using Mobile Camera Images · Research Student & Lead Developer

Google Colab & PyTorch · April 2026 – Present

- Developed a lightweight, real-time computer vision system utilizing the EfficientNet-B0 architecture with Transfer Learning to enhance automated clinical screening efficiency.
- Implemented advanced image preprocessing pipelines, applying Non-Local Means (NLM) denoising and CLAHE contrast enhancement to optimize clinical feature extraction.
- Achieved 99.65% validation accuracy within 5 training epochs; currently conducting performance evaluation and authoring the final thesis for academic publication.

School & College Event Management Committees · Chief Student Representative & Team Coordinator

Institutional Event Committees · 2021 – 2023

- Spearheaded a core cross-functional team of 10 members to successfully organize, coordinate, and execute all major institutional programs and technical hackathons.
- Delegated tasks efficiently among team members, provided real-time troubleshooting support, and ensured operational excellence across all audio-visual and stage setups.
- Acted as the primary liaison between the student body and administration, compiling and presenting formal execution reports directly to institutional heads.

KEY TECHNICAL PROJECTS

Algorithmic Problem Solving

LeetCode & Codeforces · Mar 2024 – Jan 2025

Solved 20+ algorithmic challenges focusing on time/space complexity optimization, advanced Data Structures & Algorithms (DSA), and real-time coding speed.

Web Development & Engineering

Personal & Academic · Jan 2025 – Mar 2026

Engineered responsive web applications translating Figma wireframes into pixel-perfect production code with HTML5, CSS3, JavaScript, and Git version control.

EDUCATION

Bachelor of CSE

Green University of Bangladesh
2023 – 2027

HSC (Class XII)

Gopaldi N. I. Babu College
2021

SSC (Class X)

Araihasar Model High School
2019

SKILLS & EXTRA-CURRICULAR

Design & Prototyping: UI/UX Design, High-Fidelity Wireframing, Interactive Prototyping, User-Centered Design (UCD), Figma, Design Systems.

Web & Databases: HTML5, CSS3, JavaScript, MySQL, MySQL Workbench, React, Next.js, Tailwind CSS, Responsive Web.

Tools, OS & AI: Git, GitHub, VS Code, Linux (Ubuntu/WSL), Eclipse, IntelliJ IDEA, Python, PyTorch, Google Colab.

Achievements & Activities: National Hackathon Event Participant (Green University of Bangladesh, 2025), Data Science & Predictive Analytics learning path, YouTube Content Creation.
